Full Stack Software Developer (M/F/D)

Who we are and what we offer

We are a successful startup with an international team working on our common mission: helping leaders to become the best version of themselves. Leadbacker is a cloud-based software that enables managers on all levels to run structured, digital dialogues with their stakeholders. Our team consists of likeminded professionals, who are demonstrating accountability for their work, appreciation for each other and we follow-through also in difficult situations. We offer a flexible and mobile working environment and the opportunity to grow as a team and as an individual by having instant responsibility. You can contribute creatively by helping to develop our company and to reach our ambitious targets.

We live what we build! With our internal feedback routines and ongoing trainings for new technologies, frameworks or tools, we are supporting you in your personal development journey.

And the best of all: if you go the extra mile with us, you will have the opportunity to take an additional 3 weeks of unpaid self-determined leave as well as to participate in our core-team options program.

Your Role

- Agile development of web frontend and backend systems (web and mobile)
- Continuous optimization of our applications, systems, interfaces & processes
- Collaborate on feature development for our APP and Machine learning projects
- Application of state-of-the-art technologies
- Planning, realization, implementation and development of new solutions based on modern cloud platforms (especially AWS)
- Driver for the identification of new technologies and continuous monitoring of current trends

Your Profile

- BS or MS in software engineering, computer science, business informatics or similar
- 2-3 years of professional experience in UX/UI design
- Strong knowledge in Angular + Ionic & C# & PostgreSQL
- Experienced in designing and process ability to develop unified vision for software characteristics and functions
- Excellent knowledge of software and application design
- Enthusiasm for new technologies, design trends and usability
- Service and solution orientation, agile workstyle
- Strong communication skills in German & English
