# UX / UI Designer (M/F/D)

## Who we are and what we offer

We are a successful startup with an international team working on our common mission: helping leaders to become the best version of themselves. Leadbacker is a cloud-based software that enables managers on all levels to run structured, digital dialogues with their stakeholders. Our team consists of likeminded professionals, who are demonstrating accountability for their work, appreciation for each other and we follow-through also in difficult situations. We offer a flexible and mobile working environment and the opportunity to grow as a team and as an individual by having instant responsibility. You can contribute creatively by helping to develop our company and to reach our ambitious targets.

We live what we build! With our internal feedback routines and ongoing trainings for new technologies, frameworks or tools, we are supporting you in your personal development journey.

And the best of all: if you go the extra mile with us, you will have the opportunity to take an additional 3 weeks of unpaid self-determined leave as well as to participate in our core-team options program.

## Your Role

- Graphic design & design of the user experience of our applications (web & mobile)
- Conception and implementation of design projects for responsive websites & landing pages (web & app)
- Creation of wireframes, flowcharts and proof-of-concepts
- Application of web technologies such as HTML and CSS as well as cross-platform design principles
- Design of digital services using common design tools (Adobe XD & Illustrator), Figma, Zeplin, ...).
- Independent research on relevant topics in the UI/UX area as well as trends
- Close cooperation with our top clients and developers

## Your Profile

- 1 - 2 years of professional experience in the field of UX/UI design or visual design of mobile & web solutions
- Studies or training e.g. in the fields of information design, IT, marketing or digital media
- Enthusiasm for new technologies, design trends and usability
- User interface knowledge in the design of digital services with common design tools
- Interest in trends, responsive and mobile design etc.
